## Sixtieth session Second Committee

Agenda item 52 (c)

### Sustainable development: International Strategy for Disaster Reduction

#### Jamaica:\* draft resolution

#### Natural disasters and vulnerability

*The General Assembly,*

*Recalling* its decision 57/547 of 20 December 2002 and its resolutions 58/215 of 23 December 2003 and 59/233 of 22 December 2004,

*Reaffirming* the Johannesburg Declaration on Sustainable Development<sup>1</sup> and the Plan of Implementation of the World Summit on Sustainable Development,<sup>2</sup> adopted by the World Summit, held in Johannesburg, South Africa, from 26 August to 4 September 2002,

*Recalling* the Hyogo Declaration<sup>3</sup> and the Hyogo Framework for Action 2005-2015: Building the Resilience of Nations and Communities to Disasters,<sup>4</sup> adopted by the World Conference on Disaster Reduction, held at Kobe, Hyogo, Japan, from 18 to 22 January 2005,

*Recalling also* the development section of the 2005 World Summit Outcome,<sup>5</sup>

*Recognizing* the need to continue to develop an understanding of and to address the underlying risk factors, as identified in the Hyogo framework, that exacerbate the vulnerability of societies to natural hazards, to build and further strengthen community capacity to cope with disaster risks and to enhance resilience against hazards associated with disasters, while also recognizing the negative impact

\* On behalf of the States Members of the United Nations that are members of the Group of 77 and China.

<sup>1</sup> *Report of the World Summit on Sustainable Development, Johannesburg, South Africa, 26 August-4 September 2002* (United Nations publication, Sales No. E.03.II.A.1 and corrigendum), chap. I, resolution 1, annex.

<sup>2</sup> *Ibid.*, resolution 2, annex.

<sup>3</sup> A/CONF.206/6 and Corr.1, chap. I, resolution 1.

<sup>4</sup> *Ibid.*, resolution 2.

<sup>5</sup> See resolution 60/1, sect. II.

of natural disasters in the economic growth and sustainable development of developing countries,

*Noting* that the global environment continues to suffer degradation, adding to economic and social vulnerabilities, in particular in developing countries,

*Taking into account* the various ways and forms in which all countries, in particular the more vulnerable countries, are affected by severe natural hazards such as earthquakes, tsunamis and volcanic eruptions and extreme weather events such as heat waves, severe droughts, floods, landslides and storms, and the El Niño/La Niña events, which have global reach,

*Expressing deep concern* at the number and scale of natural disasters and their increasing impact in recent years, which have resulted in a massive loss of life and long-term negative social, economic and environmental consequences for vulnerable societies throughout the world, in particular in developing countries,

*Expressing deep concern also* at the recent increase in the frequency and intensity of extreme weather events and associated natural disasters in some regions of the world and their substantial economic, social and environmental impacts, in particular upon developing countries in those regions,

*Taking into account* that geological and hydrometeorological hazards, extreme weather events and their associated natural disasters and their reduction must be addressed in a coherent and effective manner,

*Noting* the need for international cooperation to increase the capacity of countries to respond to the negative impacts of all natural hazards, including earthquakes, tsunamis, extreme weather events such as heat waves, severe droughts, floods, landslides and associated natural disasters, particularly in developing countries,

*Bearing in mind* the importance of addressing disaster risks related to changing social, economic and environmental conditions and land use and the impact of hazards associated with geological events, weather, water, climate variability and climate change in the economic growth and sustainable development of developing countries, in particular small island developing States and other disaster-prone countries,

1. *Takes note* of the report of the Secretary-General on the implementation of the International Strategy for Disaster Reduction,<sup>6</sup> in particular Section II, on disasters associated with natural hazards and vulnerability: development challenge;

2. *Urges* the international community to continue to address ways and means, including through cooperation and technical assistance, to reduce the adverse effects of natural disasters, including those caused by extreme weather events, in particular in vulnerable developing countries, through the implementation of the International Strategy for Disaster Reduction, and encourages the Inter-Agency Task Force for Disaster Reduction to continue its work in this regard;

3. *Stresses* the importance of the Hyogo Declaration<sup>3</sup> and the Hyogo Framework for Action 2005-2015: Building the Resilience of Nations and Communities to Disasters<sup>4</sup> and the priorities for action that States, regional and international organizations and international financial institutions, as well as other

concerned actors, should take into consideration in their approach to disaster risk reduction, and also stresses the importance of implementing them as appropriate to their own circumstances and capacities, bearing in mind the vital importance of addressing the adverse effects of natural disasters in efforts to implement national development plans and to achieve the internationally agreed development goals, including the Millennium Development Goals;

4. *Encourages* Governments, through their respective International Strategy for Disaster Reduction national platforms and national focal points for disaster reduction, in cooperation with the United Nations system and other stakeholders, to strengthen capacity-building in the most vulnerable regions to enable them to address the socio-economic factors that increase vulnerability and to develop measures that will enable them to prepare for and cope with natural disasters, including those associated with earthquakes and extreme weather events, and encourages the international community to provide effective assistance to developing countries in this regard;

5. *Emphasizes*, in order to build resilience in developing countries, particularly those among them that are vulnerable, the importance of addressing the underlying risk factors identified in the Hyogo Framework for Action and the importance of promoting integration of the reduction of risks associated with geological and hydrometeorological origins in disaster reduction programmes;

6. *Encourages* the Inter-Agency Task Force for Disaster Reduction to continue to enhance the coordination of activities to promote disaster reduction and to make available to the relevant United Nations entities information on options for natural disaster reduction, including severe natural hazards and extreme weather-related disasters and vulnerabilities;

7. *Stresses* the importance of close cooperation and coordination among Governments, the United Nations system, other organizations, regional organizations, non-governmental organizations and other partners as appropriate, taking into account the need for the development of disaster management strategies, including the effective establishment of early warning systems, where appropriate, while taking advantage of all available resources and expertise for that purpose;

8. *Encourages* the Conference of the Parties to the United Nations Framework Convention on Climate Change<sup>7</sup> and the parties to the Kyoto Protocol to the United Nations Framework Convention on Climate Change<sup>8</sup> to continue to address the adverse effects of climate change, especially in developing countries that are particularly vulnerable, in accordance with the provisions of the Convention, and also encourages the Intergovernmental Panel on Climate Change to continue to assess the adverse effects of climate change on the socio-economic and natural disaster reduction systems of developing countries;

9. *Requests* the Secretary-General to report to the General Assembly at its sixty-first session on the implementation of the present resolution, and decides to consider the issue of natural disasters and vulnerability at that session under the sub-item entitled “International Strategy for Disaster Reduction” of the item entitled “Sustainable development”.
